

2011 Census Leicestershire Ward Population Data - November 2012

The second release of 2011 Census data provides unrounded population estimates by age and sex, for wards. Figures from the 2001 Census are included for comparison. Further results from the census will be released later in the year, for more information, please visit: http://www.isr-online.org/reports/census_2011_what_to_expect_and_when

To use this dashboard, select a local authority from the first drop-down list below, followed by a ward from the second drop-down list and the data on the sheet will update automatically. This dashboard is best viewed in 1280x1024 and in full screen (press F11 in your browser).
